

Data Sheet

School Zone Beacon: 2400 Series SZ-2408-P, SZ-2408-S, SZ-2412-P, SZ-2412-S

Applications

School Zones

Slow drivers down and keep them alert as they pass through school zones.

Construction Zones Alert drivers as they approach construction sites.

Playground Zones Remind drivers to slow down for playground zones.

Benefits

- High Quality
- Clean Technology
- Reliable
- Simple
- Flexible
- 🖉 Elegant

Installs in minutes to minimize traffic disruption and allow for relocation and re-purposing. Adjustable flash pattern and activation duration to control varying traffic conditions. Self-contained, cabinet-free, discrete design to enhance streetscapes and inhibit vandalism.

Solar-powered and wireless to save on power bills and end roadway trenching.

Energy management system to ensure operation under all environmental conditions.

Introduction To School Zone Beacons

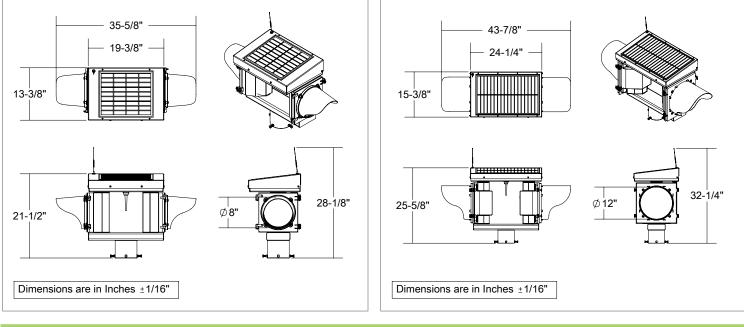

These beacons can be installed anywhere with cell phone reception and places without (via direct connection). A preset flash schedule can be created using the JSF Tech School Zone Scheduler website and then be sent to the beacons wirelessly or in person. The scheduling website can accommodate multiple years of operation, including special events for extra use and days off. Spontaneous activations and commands can also be carried out with mobile devices.

Proudly designed and manufactured in North America.

Each School Zone set is made up of two beacon types. The "Primary Beacon" contains a cell phone modem and stores the annual flash schedule. The "Secondary beacons" receive daily on/off signals from the primary beacon. Any number of secondary beacons can be associated to a primary beacon. When a primary beacon receives an instant activation command or encounters a scheduled activation period, the primary beacon relays the activation command to all secondary beacons.

2-2408 Dual 8", pole top mounting

Z-2412 Dual 12", pole top mounting

Specifications

System Overview		Communication—Inter-Beacon		
Certification	CSA and UL certified electrical components	Between beacons	ISM spread spectrum radio, 902-928 MHz	
Compliance	FHWA MUTCD compliant	Range	Up to 0.5 miles (800 m) with line of sight	
Operation	Adjustable computer schedule and Mobile device activation	Network addresses	8 unique addresses to avoid interference between multiple crosswalk locations	
Flash patterns	MUTCD (0.5 second on, 0.5 second off) or JSF Tech High Visibility Strobe Pattern	Compatibility	All SZ family beacons	
Variations	Synchronized or Wig-Wag (alternating)	Communication—Primary Beacons (-P)		
Operating temperature	-40°F to +165°F (-40°C to +74°C)	Incoming commands	Cell phone communication (requires cell phone reception) or via direct connection	
Controller input voltage	12 V DC	A primary beacon receives preset schedules from the JSF Tech School Zone Scheduler website and receives instant activation messages from authorized cell phone users.		
Controller output voltage	12 V DC			
Solar panel	8" model - 10 W nominal, 12 V, CSA certified			
	12" model - 20 W nominal, 12 V, CSA certified	Communication—Secondary Beacons (-S)		
Battery storage	AGM 12 V, 10 Ah, UL certified, field replaceable	Incoming commands	Relies on the primary beacon's commands	
Alternate power	AC / Solar hybrid available	A secondary beacon relies	on its primary beacon for all activation commands.	
Power Management			Physical Design	
Rated usage	120 mins of activation per day (average)	Configuration	Fully self-contained	
Charged capacity	25 days at rated usage (without charging)	Color	Black, green or yellow	
Auto brightness	6 stages of brightness for different light	Solar engine	6061-T6 powder coated aluminum	
rate brightnood	conditions and battery levels	Signal housing	Polycarbonate	
Customizable	Automatic brightness disabled on request	Weight	Approx — 35–55 lbs. (16–25 kg)	
Self monitoring	Visual notification of sub-optimal operation	Available mounting for	Round pole: 3.5", 4.5" Mid-pole side mount and others on request	
LED Module		Warranty		
Standard	ITE VTCSH-STD 2005	5-year Limited Warranty for defects in workmanship and materials (excludes batteries and vandalism)		
Lens	UV stabilized polycarbonate and Abrasion resistant			
Size	8" or 12" diameter (200 mm or 300 mm)			
LED color	Amber			
LED color	Amber
